

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-zicl-yzhf
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5877

Comment on FR Doc # 2025-02305

Submitter Information

Name: Chris Levesque

[REDACTED]

General Comment

The purpose of copyright is to encourage the creation of new artistic and scholarly works. The current system may be flawed, but the protections it provides are crucial to the creation of new music, art, literature, and scholarship. Allowing companies to steal the created works for the sole purpose of making derivative works without compensating creators will discourage potential authors from creating new works. Not only will those works be used to create derivatives and deny them the opportunity for profiting from their work, but it will stifle their creativity by burying them in a sea of lackluster, boring works. This will stifle the development of new art and knowledge.

Generative AI companies have failed to demonstrate any utility that justifies the massive theft of intellectual property - they are not prepared to create new works that are unique or accurate. These companies create a deluge of garbage that they cannot even provide attribution for. Down this road lies stagnation.
