General Comment

AI plagiarizes intellectual property from actual humans, be it visual arts or writing. The data centers needed to run the AI are massive contributors to the production of greenhouse gasses, cooling them consumes a vast amount of water, and they produce unrecyclable waste that pollutes the environment. AI is also a threat to security and privacy by illegally collecting and aggregating personal information to invade citizens privacy for the purposes of profiling and profit. All of this leads me to comment that it needs to be tightly regulated in order to stop it from hurting people.
