

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-zl8-5jna
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5884
Comment on FR Doc # 2025-02305

Submitter Information

Name: Ryan Martin

General Comment

AI comes in many forms, such as Machine Learning, where the datasets are legally acquired and used for a legitimate purpose like healthcare diagnostics, could potentially be beneficial.

Others examples include Generative AI. Generative AI a force of theft and destruction that is buoyed by flagrant violation of copyright law.

In all cases, it is the responsibility of government to protect people, prevent abuse, and to actually regulate industries with the potential for great harm. Any government use of AI must be done so transparently (no secret algorithms/formulae).

You must not use any AI programs to make decisions. Computers cannot be held responsible, only people can, and abdicating the authority to make decisions is what this focus on AI could bring.

Do not abdicate your responsibility to uphold the law and let copyright theft be the norm. Protect peoples privacy and authorship.

Generative AI companies are burning the earth for nothing.
