Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5894
Comment on FR Doc # 2025-02305

Submitter Information

Name: Mark Paglia
Email: [REDACTED]

General Comment

As a creator of published works, self-publisher, and longtime editor for publications, I well appreciate and understand the centuries-long tradition of copyright. Our modern copyright is the result of a long evolution, being tweaked and altered to balance the many intersecting and sometimes opposing interests of creators, publishers, consumers, and the many industries that operate somewhat invisibly around every single published work.

The proposed changes regarding copyright and so-called artificial intelligence represent anarchic chaos. They threaten to demolish untold value, both monetary and non-monetary, eliminating revenues, jobs, and quality products for the public. These changes advantage a tiny circle of investors, and harm a much larger mass of investors, workers, writers, managers, readers, learners, and, ultimately, even those who think that they are achieving good with their anti-copyright stance.
