General Comment

I am opposed to a rule that would shield the companies developing AI models from accountability for their egregious and wanton infringement of others' copyright and intellectual property generally. These companies do not own nor license many of the works used for training, and have shown no concern for the laws they've trampled in their race to develop tools that are at best, deeply, fundamentally flawed. They should not be protected from the rule of law, and certainly not after having already flaunted it for years.
