General Comment

Nobody likes AI. It's only purpose is to steal work from human beings and replace them with machines that don't need to be paid. It only serves corporations and algorithms. It is worse than sludge. I would rather every single job be taken by "illegal immigrants" than a soulless machine. This does not serve anyone; AI is unable to consistently produce good results, every AI article is bloated with misinformation, every AI video or image riddled with graphical errors, inconsistencies, all in the same horrendous, Mal-manufactured style.

And you, the person (or maybe even already the algorithm) reading this response, pushing this aside because it "doesn't affect you", it only doesn't affect you now. You are not immune if you are currently on a payroll. You will be replaced; and it will be your fault for not fighting back. Your fault for being okay with perpetuating things constantly getting worse for others because "things aren't bad for me". If AI is allowed to infiltrate every facet of society, we will get doctors, lawyers, judges and leaders who's only training is an algorithm that can sometimes be correct about simple things, but also tells people that 2 cigarettes a day is healthy for the pregnant mothers of the world.

Once the world is polluted in this way, we can't step back from it. We can't say "oops, that was a fumble" and roll it back. Google is already close to unusable. Most websites are replacing actual people with their guessing game algorithm that's "usually" correct about what it's saying. If you have the power to stop this from harming billions, don't you want to go down in history as the person who stopped this oppression before it consumed us all? Because I'd really appreciate that.
