Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5923
Comment on FR Doc # 2025-02305

Submitter Information

Name: Justin Kear

General Comment

This proposal is not compatible with the Berne Convention, US copyright law, US property law, or court precedent.

The US government should not be in the business of picking winners and losers.

If AI companies need data for training, they can do so on the same playing field as everybody else - if they want this data, they can pay to license it.

That's what I have to do, that's what every other company has to do, and that's what they should have to do.

If producing AI grants permission to ignore intellectual property rights, then what's to keep a pirate site from claiming it exists to 'provide training data'?

What keeps a pirate from training a model purely to use it as a shield?

The law MUST be fair, or you're just rigging the game.
