General Comment

"AI" is not artificial intelligence, it's a worse version of autocomplete built off of thievery and copyright infringement. It uses a ridiculous amount of energy and water, uses up space, and uses up money for worse product that will never truly stand up to any human creation; including a one year old's finger paintings. Why should we waste money protecting these greedy corporations from copyright infringement charges instead of fixing the economy, or protecting veterans, or for cancer research? The only people that support this "AI" nonsense are idiotic, greedy, or both.
