General Comment

All I can say is I am wholly against this plan. This is personally a huge step backwards for America as a whole. I was fine at first if it was related to medical needs and the like, but now its completely taking over almost everything. Two things I am especially against is the use of AI in art and calling it real art and using AI to replicate voices. This is not only taking away opportunities for artists and voice actors, in addition now if they don't comply or stand against AI, companies can now just say "we don't need you then" and replace them. Or in some cases, replace them with no prior contact. Yes this act of replacing individuals to non compliance has been a thing since before AI. It is just now that doing so because they wanted to protect their rights and took a stand against something harmful is morally wrong. I honestly hope that thus plan is stopped in its tracks!
