General Comment

Im worried about the repercussions of this. As an artist, a voice actor, and mainly as a person, I feel that allowing AI to take note of EVERYTHING available is dangerous and volatile. We are already in a world where companies are laying off human beings, Americans, in return for lesser quality AI. In Art, Voice Acting, Music, even IT. If this extends to a further position without any kind of regulation or limits, I fear what will happen to the countries citizens. With this bill not only are American jobs at risk, but American IPs are as well. Also with how open source OpenAI's API is I worry about what malicious peoples will be able to do with that access.
