General Comment

I am writing to say that I do NOT support any AI based on stolen work. Copyright exists for a reason--to protect my rights as an author of over fifty published works. If another author stole my work and put their name on it, changed the names of the characters--that would be theft and I could sue them for it. It shouldn't be any different for AI. No LLM has compensated me for my work, my knowledge or my time--all of which is valuable--but my work has been scraped repeatedly. It should be illegal for 'scraping' to happen, it's affected my sales, my ability to get future book contracts--my entire livelihood is at risk because of AI.

America is built upon the creative ideas and products of Americans, not regurgitated nonsense. AI has no future in America and no future in publishing and further investing in it is throwing good money after bad. When it crashes--and it will--it will take a lot of lazy folks' money with it.

Just say NO to AI!
