General Comment

As a citizen and a creative, it is clear to me that the development & proliferation of AI generated content is predicated on the theft and digital butchery of intellectual works of audio-visual and textual media. These programs do nothing more than collate data and piece the work of people like me into derivative slop with no understanding of text, subtext, or context. Allowing companies like Open AI to scrape the works of people like myself and feed it into their algorithms is only harmful to us and to people potentially convinced by engineered content they create.
