General Comment

Generative AI cannot be allowed to use other people's artwork, photos, media, etc. unrestricted and without permission. This is a monumental infringement of personal property and creative rights and can only lead to people in creative fields losing their livelihoods and eventually the general death and erasure of human made creative works. Independent artists are already seeing huge losses and work is drying up as companies are using AI as a cheap mindless alternative to employing actual people. The proliferation of AI images online has also caused witch hunts against legitimate artists leading to disparagement, defamation, and even death threats due the mistaking of real art for AI.
