Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-5985

Comment on FR Doc # 2025-02305

Submitter Information

Name: Brenton Workman

General Comment

The AI systems made by Big Tech companies like OpenAI (Microsoft) and Google threaten to destroy thousands of American small businesses like mine with their recent demand to create special carve outs in copyright law.

AI can't innovate. It can only steal, mash up and regurgitate what already exists.

The administration should focus on protecting creators content and not giving it to Big Tech companies.

These companies should be required to get consent to use our work. And it should NOT be assumed consent is given automatically. Opt-in, not opt-out.

And transparency from Big Tech should also be focused on. Require Big Tech to disclose what material is used in their training and AI content should be labeled as such.

I love the idea of a program that can use some technology to help streamline hard working artists work. But that's not what this AI is. This is theft of our work and of our skill on an unprecedented level. I've spent 18 years of my life as a full time artist developing my skill. We should not sacrifice the hard work of hundreds of thousands of Americans like me and give it to Big Tech by rewriting copyright law.

Art is used in every product you see. Your box of cereal, the design of your shoes, the design of your car, the movie you watched, everything. That's an unprecedented amount of jobs that are threatened by AI theft.

Please do the right thing and protect hardworking Americans.
