Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6006

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eve Howard

General Comment

If OpenAI has its way, no one will own the things they make anymore. They want the ability to use millions or billions of pieces of intellectual property without proper licensing, attribution, or compensation, all so that they might make GPT 5.0 a little better at sounding human. It won't suddenly stop hallucinating, and it won't suddenly gain reasoning skills, it will just be marginally better at producing text that appears similar to human-generated texts. At the cost of the livelihoods of millions of artists of every kind across the country and the planet.

Furthermore, as can be seen by some of Microsoft's latest actions re: OpenAI, not even its primary investor believes that OpenAI will be a truly important part of the world going forward - if they did, they wouldn't have backed down on some of the data center contracts they have been pursuing.

The White House wants to get rid of "burdensome" copyright laws that protect regular people, so that they can benefit a corporation that might not even last 10 more years. Do not do this.
