

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-zou4-gyin
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6023

Comment on FR Doc # 2025-02305

Submitter Information

Name: K Lagerquist

Email: [REDACTED]

General Comment

I was told that "National security hinges on unfettered access to AI training data, OpenAI says." This is not only incorrect at best, but embarrassingly wrong at worst and stupid all around. National security hinges on actual person-to-person conversation, first-person observations, and data collected by educated, trained individuals. It relies on non-partisan well-trained diplomats and educated, multi-lingual personnel. It relies on actual humans who understand nuances that technology cannot ever "understand." It does not rely on whether or not a machine has unfettered access to the Baby Sitters Club series, Mary Higgins Clark books, Encyclopedia Britannica, and the back catalog of Penthouse forum letters.

If OpenAI the product cannot succeed on its own, then it wasn't ever good or needed to begin with.
