General Comment

There is no justifiable reason to allow private corporations the legal cover to steal other people's work for their own personal gain. If companies want to train their AI on other people's work they should compensate those people for their work.

Furthermore, the benefits of AI are wildly exaggerated. The types of AI that show actual utility for specific tasks are trained on carefully curated data sets and not everything that can possibly be found on the internet.

There is no value to the public in stealing people's work and filling the Internet with AI slop to the point the Internet becomes useless.
