General Comment

AI is overhyped and is not that impressive. There is no reason that any AI company should be allowed to steal information from everyone in order to try and make a model. These model are incredibly inaccurate. They lie all the time. The developers have no way of stopping models from lying. They have no way to stop models from giving you incorrect information. Not a single AI company is profitable. Apple cannot sell their iPhone with AI. Microsoft cannot get people to buy their OS with AI. OpenAI is losing subscriptions. Anthropic has a tiny user base. Meta already used copyright data in their models (as directed by Zuckerberg) and their models are terrible.

People that create (artists, musicians, writers, etc.) deserved to be paid for their work. Letting AI companies steal from them without paying them is unfair to the creators. This is especially the case when it would be unprofitable companies with technology that no one wants.
