## General Comment

Passing this bill will destroy any and all copyrighted work and art that is created. Not only that, but these Generative AI programs show glaring issues such as spreading false information that HAS caused harm to people, racial and ethnic bias by portraying people of color in negative ways while white people are portrayed positively, and the servers these programs run off of take up some much energy and resources just to generate one response. I urge you to not let this bill be passed because it will only cause nothing but harm.
