General Comment

As a content creator who makes a living from my copyrighted work, the idea that Open AI can simply consume my work without any sort of compensation or even recognition is beyond the pale. If this is allowed, and copyright no longer has any relevance, then it is going to negatively affect the incomes of a huge number of creatives while agglomerating power in the hands of people who already have too much of it while continuing to decay the reasoning and thinking ability of entire generations of human beings.
