General Comment

Hello

I am one of many artists living in the United States, while I draw and produce art for pleasure and not profit; I have many artist friends that do earn a living wage on art. Some of my friends have only Freelance and Commission Art solely as their job, and with AI cropping up into this field; they are very understandably worried about it hurting their business.

It is not just Commission and Freelance that is being affected by this, even I am quite worried with how unethical AI has become up to the point of it being indistinguishable from the real art at times. It has been proven time and time again that the companies behind these AI models need to use 3rd party sources to train their models so it can generate art. We are not being asked permission for this either, the companies are taking our pieces and feeding it into the model. There have been numerous examples of the AI Images being generated even copying our watermarks.

Not just art has been done like this, AI Voice models are becoming a real problem. On Youtube, there are a plethora of videos of the US Presidents playing various video games and using their voices with this AI Model. Famous Celebrities are also having this as well to fool the common people into thinking whatever the AI user wants to put out. There are now models of AI Record-and-Capture tools to even take our voice against our knowledge and can be performed to do many acts, illicit or not.

Music is being affected with so many videos being recommended of AI Generated music, sometimes with vocals. These models like ChatGPT have also been used to make reports, speeches, and even school work; there is no creativity in something that has not been imagined and tailored by human mind and hand nor the drive of human spirit.

This is becoming an epidemic of thievery, and one that needed to be addressed back in 2022 when it was becoming mainstream. I propose an outright ban on AI Generation, it serves nothing to us on any manner of scale. These AI Models are power hungry to the point of reopening Three Mile Island, of which I needn't remind anyone of what happened there on 28th of March, 1979.
