Status: [REDACTED]
Tracking No. m8a-zsz2-p6kd
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6099

Comment on FR Doc # 2025-02305

Submitter Information

Name: Avery Porco

General Comment

I believe the scraping of copyrighted material for the use of generative ai training is antithetical to the entire point of the copyright system. It aims to protect authors and artists, but allowing generative AI, which by its very nature can only ever be derivative and copy, to train off of copyrighted material would mean an end to those protections.

In addition, it is outright theft on a massive scale. corporations and independent artists would be responsible for the bulk of the work in training, but receive no credit, no kickback, and in fact would only be hurt by this.

There are arguments to be made on the efficacy and use of generative AI, but as the methods of generation currently stand, there is no way to allow training on copyrighted material without fully dismantling the copyright system in its entirety.
