General Comment

Dear Sir or Madam,

I am writing to urge you not to permit OpenAI to steal intellectual property from American scholars and researchers. This project will destroy my right to my own intellectual property and that of my peers to the advantage of tech firms owned by the private sector. The emergence of copyright protections in the 19th century was a signal advance for creative individuals. Now, by presidential fiat, this plan seeks to overturn centuries worth of progress in protecting intellectual property. AI has no useful role to play in our society, it is a fad in which some tech companies have invested quite a bit and therefore want to see it made lucrative. But it is not, it does nothing positive to advance any of the stated goals, it merely recycles what is online. Do not advance this project, it is worthless.

Sincerely,
Liam M. Brockey
