General Comment

No no no and please no. Do not let copyrighted material be used to feed AI (without compensation). This is just stealing. If I feed enough of your work into the AIs being developed today, the AI can eventually produce something similar to yours, but it would not have been able to do so without your work. This is commercial use and should be compensated. Do not let the makers of AI rob creative producers blind. This is completely against the public good. It will drive creators out of work and deprive the rest of us of the fruits of the works they would have made.
