General Comment

As an inspiring artist and general supporter of the arts and artists, protect us. Not AI. AI has been built off the back of millions of of artist with our knowledge, concent, or care all while stealing jobs, spreading misinformation, and destroying multiple industries.

Now AI companies want to take away the *one* thing protecting us and allowing yo fight this massive theft fair use and copyright. If AI can not exist with out stealing from everyone and everything, it doesn't deserve to exist in the first place.

Setting aside the theft and job instability inherent to generative AI... it's just a misinformation nightmare. With out regulation or checks ai will turn into a beast that will consume every inch of the internet until nothing can be none for sure. Not egg prices, not travel routes, not stock prices or projections. AI is already spreading misinformation and lies about the world and if allowed to continue, that will all pur lives are t built by.

Allowing AI to change copyright and fair use and to develop woth checks will create a dangerous precedent for all tech and compnaies. I do NOT want to live in a world where tech companies can take whatever they want, do whatever they choose with it, and ignore the wishes of those responsible for providing them with their creation.

AI is theft. AI is violating millions of US citizens rights and proections. And AI must NOT be allowed to continue.
