General Comment

Having ai as a tool can be great but when ai is in charge with out human overseeing it leads to death.

Thats a really dramatic statement but its the truth. When a person loses their job to ai and cant provide a lively hood and cant find something else to do? They die.

When ai is in charge of accepting or declining medical procedures with a chance of it having a flawed bias?

People die.

And when people die . Other people get angry and the whole thing becomes chaos.

To make it easier stick with having ai as it was ment to be. A tool not a person.
