Comment on NSF's Development of AI

March 15, 2025

From:
Joshua Phelan
Software Engineer

Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I'm a software engineer who has been active in the industry for nearly 20 years. I've seen technology flourish with many incredible breakthroughs. I've also seen it abused to enrich some at the expense of others.

The so-called Artificial Intelligence technology we're seeing now falls squarely into the latter category. It's fed the hard-work of numerous creators and artists without any compensation and regurgitates pale imitations devoid of life or meaning. It's despicable, and the thought of giving these companies carte blanche to unbound legal theft is even more despicable still.

Giving these tech companies, such as Google and Microsoft, the go-ahead to steal the work of others won't usher in a new era of artistic creation, but the opposite. It will stifle true artistic creation in favor of a bland mish-mash of second-hand ideas.

Instead of supporting the horrific acts of these companies the government should be safe-guarding the works of individuals. Any "AI" model trained on a person's work without their consent should be held legally accountable. It is theft on a massive scale.

Thank you for considering my comments, and I hope you see reason on this matter.
