General Comment

I do not believe AI holds a place in the future of the US. AI steals from my livelihood as an American and profits off of theft. AI steals from individuals as well as larger companies. We as individuals should not be heavily reliant on artificial intelligence to be able to form our thoughts. AI should be limited and not relied on in this way. AI should help and not take, steal, and control the population of the US. This plan is unnecessary and I believe it will break regulations and copyright issues. I understand that AI can be used in a multitude of ways, however, we as a society and organization should not use this technology in this manner.
