Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I am a Freelance artist that one day hopes to contribute to the million dollar industry that is Animation/entertainment. Even though "AI" and Language model technology is promising for fields Like science and technology, And will likely birth jobs to develop and moderate these advancements. It poses a real threat to creative works and careers. Could terminate thousands of job and render that entire industry and discipline null. Affecting American exports of entertainment all over the world.

I really hope Big tech doesn't win on this.
