General Comment

These LLM require huge swatches of data from online to exist. Why is their data laundering allowed to pull from my work without credit, permission, acknowledgement, and without compensation? Just because these data sets encompass so much of human work that the individual pieces get lost from view, does not mean our work is without value. There needs to be regulations, laws, restrictions, and reviews. Our current legal systems are extremely behind on these issues that ai is generating. I fear what happens if human work is so undervalued and diminished due to the sheer scale of the theft involving everything ever made by all of human existence.
