## General Comment

The rampant misuse of artificial intelligence in practices like "AI generative art" violate any sense of ownership that the creators of the past, today, and the foreseeable future deserve to keep. As the country responsible for the most media output on earth, it's disgusting to think of the ways that creations that millions have invested their time, effort, and affection into are being stolen and functionally destroyed. Any company responsible for these generative AI tools should at the very least be required to pay for the rights to utilize the assets they've otherwise been stealing.
