As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-zxuy-fwil
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6221

Comment on FR Doc # 2025-02305

Submitter Information

Name: David Taylor

General Comment

I do not want my intellectual property to be used for AI learning. If they get to use my data and everyone else's data then this is tantamount to theft. You are stealing my hard work and creations to profit from it without me knowing and without my say. You can't have it both ways. Copyrighting information so others can't use, but give AI a pass to use everything. They should not be able to bypass copyright for their AI training. That's not how copyright works. It should be the opposite. The AI can only train on data they have bought or have been given permission to use.

If a person downloaded a book you wrote without paying for it then they can be fired or punished. But if an AI scrapes and downloads the book, learning from it and "understanding" it then that's ok? How is that ok? They used my creation without my permission to turn a profit.

If I upload a picture I took on my phone or a drawing from my tablet and a big company downloads it and uses it for themselves then I could sue them. But an AI scraping the data I uploaded shouldn't get punished? The AI is part of a big company and they shouldn't be using my creation.

Just because the data is on the internet doesn't mean you can just call it your own. Just because it exists doesn't mean it's yours. I learned in high school and college that citing sources is extremely important. AI doesn't care about sources or who made the image or writing. They want to take whatever they can without paying people what they are owed.
