General Comment

This plan is a transparent attempt for large corporate entities to obtain federal funding to continue to steal intellectual property from creatives in an attempt to undermine and eliminate human workers. Any plan for incorporating LMM or AI must include safeguards against intellectual property theft, reductions in workforce due to implementation of the technology, and stringent regulations that allow for innovation without sacrificing human livelihoods and talent. AI should be an aid for human workers, not a method for reducing a workforce. I do not support, and will not support, any incorporation of corporate AI with the US Government unless these stipulations are met, and neither should anyone with integrity.

I am including a variety of articles that provide context and an overview about the various lawsuits that prominent AI companies are currently involved in to further my point.
