General Comment

AI is theft. It is not something that should even be considered in the U.S future. It steals from artists trying to make a living just so it can be a "convenient and cheap" option for companies. If this goes through what about future careers? No one would want to go into any creative fields. Art, writing, etc anything of this nature should be practiced and celebrated even. What kind of world would our future generations live in where all of that could be done with a single sentence? Not challenging themselves creatively nor at all. Not to mention the ecological impact of training AI as it currently stands consumes ridiculous amounts of energy and, in many cases, precious freshwater resources to cool these training centers.

Please reconsider this. It isn't as simple as you may think. People's livelihoods, careers and creative freedom are at high risk if this is passed.
