General Comment

"GenAI" is not actually "artificial intelligence" but a prompt/answer program that wastes resources and can't even supply correct answers when asked questions. People will use this computerized Mad Lib and profit off it, not to mention the creators of such dubious systems, but where is the compensation for the people whose work and information has been stolen in order to do this?. I vehemently reject this and do not consent to these people using my information/data/creation in such a way, and I do not wish the government to cosign on something that violates people's rights and properties as such.
