## General Comment

- \* I do not believe AI holds a place in the future of the US
- \* AI steals from my livelihood as an American and profits off of theft
- \* AI is overhyped and is fleecing the eyes of the American public.

The purpose of copyright is to protect the hard work of creators from exploitation of others. Allowing any entity, whether an individual, business, corporation, or whatever to use copyrighted materials with immunity opens these items up to abuse and would be tantamount to theft given what has been seen in the last few years of smaller scale attempts of training LLM.

I am against granting immunity of copyrighted work or really any work for the purpose creating, training, or otherwise implemented for generative ai, generative content, or AI in general.
