General Comment

We should not be allowing AI to train on existing creative and academic works. The only thing generative AI is capable of doing is regurgitating information and likenesses that are already published, and in remixing those assets to create something "original," it can generate misinformation or copyright-infringing recreations. If we use generative AI as a crutch, our entertainment industry will keep reproducing the same stories and our students will keep reproducing the same arguments. The original creations of our diverse human population still have value, and I do not wish to see that undermined by a motion that would allow those with more financial and social power to profit off of works derivative of the common people's original ideas.
