General Comment

This bill is nothing but a farce. Please for all that is good in the world, do not pass whatever bill this is. The world needs creative people to be able to create freely & happily. OpenAI is nothing but a sham & because big companies are trying to push it, they are trying to make only the most amount of money possible without properly crediting creatives.

While AI as a concept can be very useful in automating certain industrious & mechanical tasks, it has no place in the creative industry. The creative industry is formed by actual, hard working people, for people to enjoy such creative endeavors.

We the people had so much be taken away from us by the hands of big corporations, please don't let grifters take away our means of creativity too.
