General Comment

I don't believe that AI offers any benefit to America or its citizens.

AI can only exist with massive IP theft, using the labor of artists, writers, researchers, photographers, film makers and more all without their consent or compensation.

AI takes up massive amounts of energy, which increases energy costs for Americans, and creates more pollution.

AI cannot offer what human workers can, stifling innovation and creating worse products at higher costs. No amount of money or IP theft will make the exchange worthwhile to anyone.

AI causes great harm to Americans by creating massive amounts of convincing misinformation. Americans are being bombarded with algorithmically fed information each day, which is more and more disconnected from truth.

The action plan should be to protect workers from IP theft, increase regulations on AI, crack down on AI generated misinformation and cease funding for AI.
