General Comment

Training AI on copyrighted and independently owned IP without proper compensation to the original artists is theft and downright against the very foundation of American progress and strengthening the economy. Removing the ability for owners of art to take measures to protect and be compensated for their work cannot be excused by an argument of efficiency. This shows a lack of ingenuity and innovation on the part of American engineering, which we should be investing instead of AI models that waste energy and are harmful to the environment with their poor systems.
