General Comment

"This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution."

OpenAI is claiming that without the rights to use copyrighted information without paying a fee to the owner of this material. They claim that without this ability, they cannot compete in the development of AI.

I do not believe this claim.
They are making this claim solely in order to avoid paying for the data.

This provision would violate copyright law, for no reason. At the very least, the request should be granted by the courts, NOT through an executive order.
