Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6376

Comment on FR Doc # 2025-02305

Submitter Information

Name: Henry Thomas

General Comment

I strongly oppose the development of any AI policies that do not protect the copyrights and livelihoods of artists, writers, and content creators. AI models are based on training data that is by and large collected illegally, without permission or consent, and in direct violation of copyright law and intellectual property protection. This negatively affects the livelihoods of millions of artists, writers, photographers, musicians, and other content creators, whose work is being stolen for programs that act as direct competition. AI companies should not be given a pass to steal the work of American creatives on an unprecedented scale. If AI models cannot be developed without copyright infringement, without taking people's work without permission, then they should not be developed at all.
