## General Comment

AI is a joke. There is nothing good in it. It has no ethics. It is destroying our world. We spend more time fixing the errors. It is robbing people of jobs and suppressing wages. I find it embarrassing we cannot rely on our own intellect to grow and improve. I want artists and creative to thrive without their work being fed into a machine and ruined and replicated. There is no heart or soul in AI. Do your jobs. Stop AI. We cannot be a lead when we are relying on the computers to do the work. I spend every day wondering if I will lose my job to AI. I am sick with stress and I can't sleep. Stop this. And stop it now. Stop listening to big tech and venture capitalists and private equity. Value and protect the citizens. We cannot thrive with AI. It must die.
