General Comment

AI has been doing the opposite of advancement. Thanks to AI my job opportunities have dried up, internet search is useless, misinformation is everywhere, and it is a danger as long as it remains unmonitored and unregulated. I do not think AI should have access to work and information without consent.

It's already violating hipaa. People have used it to create deep fakes. And it wastes energy just to make up lies. It has also been a giant waste of money with no tangible results.

Limit and regulate AI. Do not give it more access to information.
