Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6407

Comment on FR Doc # 2025-02305

Submitter Information

Name: a concerned American

General Comment

I think that AI has done and will continue to do more harm than good, especially without limits. I don't think that AI has a place in the future in this country that I care about so much. Any place that AI is granted with regards to this country's future will Ruin the lives of Millions of Americans including myself. There is abundant evidence which shows that AI profits off of Theft, and small to medium creative enterprises are and will continue to be unilaterally and disproportionately affected by AI. Small to medium creative enterprises are one of the backbones of our entire society, and they represent the livelihoods and passions of Millions of our citizens. It is Far too overhyped, and it is so overhyped that it is clouding the judgements of some of my fellow Americans and leaving them in the dark with regards to just how harmful AI is.

If this act goes forward, this country, that myself and millions of others are proud to call home, is DOOMED.
