General Comment

LLM-based, so called "AI" is a dead end technology that is environmentally disastrous, fundamentally unfit for purpose, and should be regulated out of existence. It cannot provide accurate information, accelerated spam and scams, and is entirely unaccountable.

All the while, it depends on the wholesale theft of IP from everyone from ordinary people, to the largest publishers in history. This theft creates a chilling effect on authorship for anyone without access to a team of IP lawyers to defend their rights, as the creators of this technology use the existence of a work as sufficient justification to steal and replace it.

The US government should be at minimum discouraging, and frankly, banning this technology. Not encouraging it
