General Comment

The unregulated use of AI development will not allow humanity to flourish, but rather just the corporations who are developing them. Companies that balantantly want to ignore the rights and protections of US Citizens for the sake of profits.

Proper regulations need to be put in place to protect citizens privacy, safety and respect the ownship of Intellectual Properties, including those of small businesses and independant/contract workers who are at risk of their work being used to train AI systems to replace them.

There also needs to be regulations on the power consumption of these AI systems to limit their potential impact on electrical infrastructure and the enviornment as a whole.
