General Comment

Artificial intelligence must be made to use the same rules for copying and deriving as all of the rest of us. A human would not be allowed to freely create copies of another persons work and claim it as their own, this should be true to AIs as well.

Allowing unrestricted access for AI companies also poses a great risk to any and all capital that is generated for copyright holders as well. This would mean that any media could be re-created as an "ai copy" and redistributed for free, effectively legalizing piracy
