General Comment

You are making a huge mistake. This is really bad for the free market. A lot of people don't want AI. Companies who embrace AI are losing a lot of money on it. Do not do this. If you really care about economic growth, then you have to shelve this plan immediately! AI is a speculative market similar to cryptocurrency and NFTs, with false promises to fool the public and huge legal problems by enabling them. Nvidia's \$600B market cap drop was not an accident, AI is a speculative bubble waiting to pop. We are talking about a potential market collapse here and that's going to hurt the shareholders a lot. Billions and billions of dollars just erased because some companies fought chasing AI would work so well except the people don't want that.
