General Comment

AI should not be allowed to have unilateral access to other people's materials, art, and personal data nor should it have a role in determining any public policy. A technology that cannot get basic facts right should not be given complete access to everything in the US government nor should the companies that design it be allowed to avoid all legal restrictions. No company should have that much power, especially with a technological area that is notoriously incapable of understanding that a word can have multiple meanings.
